

Product/Package Design

LAYOUT & DESIGN

Designed and developed product packaging and labels including 3D models, technical assembly manuals, and advertising campaigns promoting products.

ANTENNA ASSEMBLY

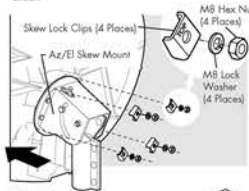

Step 1

Insert M8 x 90 mm plow bolts through upper holes of reflector and M8 x 60 mm plow bolts through lower holes.

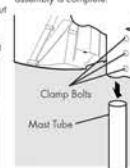

Step 2

Secure Az/EI Skew mount to reflector with four clips, M8 lock washers and M8 hex nuts. Note orientation of "TOP" on Skew Lock Clips illustration to properly attach.

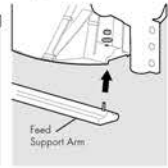

Step 3

Slide Az/EI/Skew mount over mast tube and loosely fasten clamp bolts until final assembly is complete.

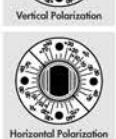

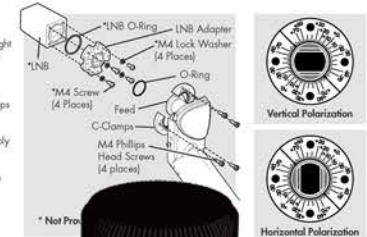

Step 4

Attach feed support arm to reflector with M8 washer and M8 hex nut. Fully tighten all hardware.

Step 5

Assemble adapter to LNB as shown on right using screws and hardware supplied with LNB.
