A Leader in the Telecommunications Industry

ascSignal is a leading global manufacturer of antennas and RF electronics for enterprise and consumer satellite communication applications.

For over 28 years, ascSignal has been a leader in the design and manufacture of antennas for the satellite communications industry. Our experience includes an extensive range of design, prototyping, testing and manufacturing capabilities beginning with high volume **Direct To Home** antennas and electronics products for consumer television, receive antennas and electronics products for consumer and enterprise VSAT antennas and electronics products for consumer and enterprise networks, earth station antennas and systems for broadcast and broadband applications.

ascSignal designed and built products cover C, Ku, K, X, and the emerging Ka band frequency platforms. The extensive range of products include type approved earth station antenna hubs and gateways for broadband and broadcast, complete VSAT Outdoor Units (antennas, transceiver electronics and installation mounts) for consumer broadband and enterprise networks, Internet access and real time communications, and enterprise networks providing the "last mile" connectivity to customers for virtual private networks, Internet access and real time communications, vehicle mounted communications, tactical MiCom, Air Traffic Control and Weather Radar, and troposcatter antenna systems for government and defense applications. Other antennas and electronics for home satellite television entertainment systems, and complete installation, testing, and value-added services.
